Abstracts

The global Microbial Fungicides market size is expected to reach \$ 441.5 million by 2029, rising at a market growth of 14.9% CAGR during the forecast period (2023-2029).

Microbial Fungicides refer to fungicides that contain a microorganism (usually a bacterium or fungus) as the active ingredient. Biofungicides can control many different kinds of fungi and water molds, although each separate active ingredient controls only certain pathogens. Some also control bacterial diseases. Virtually all of the organisms used in biofungicides on the market today occur naturally in soil or on plant surfaces, and most are approved for use in organic production.

This report studies the global Microbial Fungicides production, demand, key manufacturers, and key regions.
