Abstracts

A healthy skin microbiome protects from pathogens, damage and dryness, and also lead to more radiant and healthy skin. As a matter of fact, the best skincare practice involves limiting the amount of anti-bacterial skincare products and not over-cleansing skin. Additionally, using prebiotic- and probiotic-rich products can have a beneficial effect on our skin by keeping it moisturized and delaying signs of aging. An increasing number of industrials have seized this market opportunity and developed care products adapted to the skin microbiome. The global microbiome skincare products market has embraced distinct approaches, targeting the skin microbiome on three different fronts: probiotics, prebiotics, and postbiotics. Skin's microbiome can easily become unstable owing to a number of internal or external factors including pollution, sun damage, and irritating skin care products.

Probiotics and prebiotics can provide beneficial effects to the skin as these are targeted to favor those cutaneous microbial species which are believed to be good for our skin. In both cases, the intention is to balance skin microbiota to enhance it. help protect against infection, aid in wound healing, limit exposure to allergens and UV radiation, minimize oxidative damage, and help keep the skin barrier intact and well hydrated. The Microbiome Cosmetic market covers Cream and Lotion, Skin Cleansing Lotions, Skin Facial Masks, Skin Serums, Others, etc. The typical players include L'OREAL SA., The Est?e Lauder, Amorepacific Corporation, P&G, Johnson and Johnson, Unilever, Yves Rocher, Korres, etc.
