According to our (Global Info Research) latest study, the global Microchannel Cooler market size was valued at USD 114.6 million in 2023 and is forecast to a readjusted size of USD 225.4 million by 2030 with a CAGR of 10.1% during review period.

Micro-channel cooling is commonly achieved with the aid of a heat sink consisting of a high conductivity substrate that contains a large number of parallel, small diameter channels. These heat sinks are very compact and lightweight, and by allowing the coolant to undergo phase change (boiling) along the channels, they provide heat transfer coefficients far greater than those possible with single-phase liquid counterparts.

Global core microchannel cooler manufacturers include Micro Cooling Concepts, Mikros Technologies, Stellar Industries etc. The top 3 companies hold a share about 60%. North America is the largest market, with a share about 80%, followed by Japan with the share about 10%. In terms of product, stackable type is the largest segment, with a share over 50%. And in terms of application, the largest application is lasers and optics, followed by power electronics.
