According to our (Global Info Research) latest study, the global Microgrid market size was valued at US\$ 33760 million in 2024 and is forecast to a readjusted size of USD 71540 million by 2031 with a CAGR of 11.5% during review period.

A microgrid is a small power grid with defined boundaries that can operate both when connected to the larger electrical grid and as an 'island' when there's an interruption on the main grid. It draws on distributed energy resources, like solar power, to serve customers within the microgrid footprint. These benefits extend to surrounding communities, with reliable energy allowing better access to food, supplies and public services.

Global microgrid key players include ABB, NEC, GE, Aquion Energy, Echelon, etc. Global top 5 players hold a share about 25%.

North America is the largest market, with a share about 41%, followed by Asia-Pacific, having a total share about 40 percent.

In terms of product, grid-tied is the largest segment, with a share about 78%. And in terms of application, the largest application is commercial or industrial microgrid.
