According to our (Global Info Research) latest study, the global Micropower Operational Amplifier market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

On top of a miniature sensor system, an op amp provides the necessary buffering and conditioning for the low-voltage sensor signal, but needs to stay within a very tight power budget. This requirement has led to the creation of micropower op amps. Micropower op amps can meet the signal conditioning requirements of most sensor systems.
