Abstracts

The global Microsoft Dynamics NAV Consulting Service market size is expected to reach \$ 6826 million by 2032, rising at a market growth of 6.3% CAGR during the forecast period (2026-2032).

Microsoft Dynamics NAV consulting services refer to the professional technical support, secondary development and management consulting services provided around the classic enterprise resource planning system of Microsoft. This specialized product is strictly limited to the maintenance and optimization of the native architecture of NAV, as well as the consultation for a smooth transition to modern cloud architecture. Its upstream supply is mainly provided by Microsoft for technical patches of previous versions, recovery of authorization keys, and the latest cloud migration toolkit; the middle stream consists of Microsoft-certified gold partners with long-term NAV implementation experience, independent software developers, and consulting companies specializing in the digitalization of medium-sized enterprises; and the downstream precisely connects with medium-sized enterprises worldwide that are still running old versions of the system, such as manufacturing, trade, and distribution companies.

The Microsoft Dynamics NAV consulting service is currently in a critical transition period from 'code customization maintenance' to 'cloudification of data assets'. The future market trend is characterized by the use of automation conversion tools to achieve logical reconfiguration of historical complex plugins to modern application plugins, consulting on heterogeneous system integration based on cloud interfaces, and the secure and compliant cleaning of unstructured financial data in old systems. The core factors driving this market development mainly stem from the security defense vulnerability crisis faced by enterprises after the mainstream support for old systems

ends, the urgent need for mobile collaboration and real-time big data analysis in modern business scenarios, the failure of old system functions due to updates in multiple countries' tax and financial compliance policies, and the financial motivation of enterprises to release local server maintenance costs by migrating historical ERP data to the cloud.

This report studies the global Microsoft Dynamics NAV Consulting Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Microsoft Dynamics NAV Consulting Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Microsoft Dynamics NAV Consulting Service that contribute to its increasing demand across many markets.

Highlights and key features of the study
