Abstracts

According to our (Global Info Research) latest study, the global Midwifery Service market size was valued at US\$ 1504 million in 2024 and is forecast to a readjusted size of USD 2378 million by 2031 with a CAGR of 6.8% during review period.

The Midwifery Service market has experienced a noteworthy evolution, reflecting a growing emphasis on personalized and holistic approaches to pregnancy, childbirth, and postpartum care. This market segment responds to the increasing demand for alternatives to traditional hospital-based maternity care, as well as a desire for individualized support that addresses the emotional, physical, and cultural needs of expectant individuals. Midwifery services encompass a range of care options, from certified nurse-midwives (CNMs) and certified professional midwives (CPMs) providing home births and birthing center experiences to midwives working in hospital settings to offer integrated care with medical interventions. The market's growth is fueled by an awareness of the benefits of midwifery care, including lower intervention rates, increased patient satisfaction, and improved maternal and newborn outcomes. As maternal care becomes more patient-centric and diverse, the Midwifery Service market is likely to see sustained expansion, fostering collaborations between midwives and other healthcare providers and inspiring ongoing innovation in maternal and newborn care practices.
