Abstracts

According to our (Global Info Research) latest study, the global Mild-Hybrid Vehicles market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A mild hybrid car works just like a hybrid vehicle, but the key difference is in its battery. Unlike hybrids which can have the battery alone power the car, and therefore work just like an electric car, a mild hybrid can't. That means you'll always be using your combustion engine alongside the battery.

Due to increasingly stringent energy consumption and emission regulations in Europe, European manufacturers represented by BMW, Mercedes-Benz and Audi have led the promotion of the application and promotion of 48V mild hybrid systems.
