According to our (Global Info Research) latest study, the global Military Non-Steerable Antenna market size was valued at USD 510.4 million in 2022 and is forecast to a readjusted size of USD 798.5 million by 2029 with a CAGR of 6.6% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Military non-steerable antenna refers to a type of antenna system used in military applications that cannot be electronically or mechanically steered in a particular direction. These antennas are designed to be fixed in a specific direction or provide a broad coverage area for communication and other military purposes. Unlike steerable antennas, non-steerable antennas do not require any motors or servos to change their direction, making them simpler and more rugged. They are often used in situations where a simple, reliable, and low-cost antenna solution is required, such as in fixed communication links or ground-to-air communication systems.
