The global Military Shelter Systems market size is expected to reach \$ 887.8 million by 2029, rising at a market growth of 7.1% CAGR during the forecast period (2023-2029).

Global key manufacturers of military shelter systems include Kratos, Tellhow, AAR, Luping Machinery and others. The top six manufacturers account for more than 40% of the market share, with the largest manufacturer being Kratos with a 10% share. The global origins are mainly distributed in North America, Europe, China, etc. At the consumption level, North America is the largest sales market, with a 34% market share. In terms of product category, it is divided into small shelter systems and large shelter systems, with the former holding a major market share of 63%. In terms of its applications, medical facility bases hold the largest market share with 30%, while command posts, aircraft and vehicle maintenance are also its major applications.

Military Shelter System (or Deployable Military Shelter) is one of such product which is used in applications ranging from temporary medical support centres to incident commands and fatality management centres to emergency distribution centres. These systems are deployed in remote area for temporary period. These systems are totally mobile in nature and are made up of technical textiles. These systems are largely used by infantry, rescue team and medical support team but constant research and development in this niche product segment unfolded new opportunities. Nowadays, availability of shelter systems for military application has not limited to support and shelter to just Command Posts but also Medical Facilities Base and Aircraft and Vehicle Maintenance. A few of the North American and European companies developed deployable shelter systems to be used as hanger for Aircraft and Vehicle Maintenance.
