Abstracts

The global Military Virtual Training market size is expected to reach \$ 13680 million by 2032, rising at a market growth of 2.1% CAGR during the forecast period (2026-2032).

Traditional military virtual training is mainly flight simulators with training missions including how to fly in battle, how to recover in an emergency, how to coordinate air support with ground operations, etc. Nowadays the virtual reality technology is gradually used in the military virtual training. In virtual reality military training, a computer-generated environment simulates reality by means of interactive devices that send and receive information and are worn as goggles, headsets, gloves, or body suits. They are more cost savings.

The major players in global Military Virtual Training market include L-3 Link Simulation and Training, Boeing, CAE Inc, etc. The top 3 players occupy about 55% shares of the global market. North America is the main market, and occupies about 60% of the global market. Traditional Military Virtual Training is the main type, with a share over 95%. Flight Simulation is the main application, which holds a share about 50%.
