## Abstracts

Milk Replacer is a consistent quality feed to meet the growth and development targets of the young calf, lamb, piglet or other young animals.

Scope of the Report:

This report focuses on the Milk Replacer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The Milk Replacer industry concentration is not high; there are more than one hundreds manufacturers in the world, and high-end products mainly from U.S. and Western European.

Global giant manufactures mainly distributed in U.S. and E.U. The manufacturers in U.S. have a long history and unshakable status in this field. Manufacturers such as ADM and Cargill have relative higher level of product's quality. As to France, Lactalis has become as a global leader. In Ireland, Glanbia and Volac leads the market development.

The key consumption markets locate at developed countries. The Europe takes the market share of 75%, followed by North Amreica with 19%.

We tend to believe this industry becomes more and more mature, and the consumption increasing rate will show a smooth curve.

In the international market, the marketing channels characteristic differ from company to

company.

The giant companies are more likely to set their own big agents in some major countries and regions taking charge of regional business building their international market position.

Small companies, in contrast, put more effort on direct selling business. They can act as exports at the same time, and it is a common phenomenon in this industry. As they do not have that much international brand influence, their product quality is not good enough when comparing with leading companies, however, they have price advantage. They like to expand their market share in developing countries and low-end international market.

The market is not only influenced by the price, but also influenced by the product performance. Although China domestic companies have price advantage, the application is narrow to some extent due to the poor manufacture processing, cheap raw material and less diversity of products.

The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market.

Looking to the future years, the slow upward price trend in recent years will maintain. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.

Company mergers and acquisitions, and inter-companies cooperation have occurred for development and growth.

This industry is affected by the economy and policy, so it's important to put an eye to economic indexes and leaders' prefer. With the global economic recovery, the need of Milk Replacer will increase.

The worldwide market for Milk Replacer is expected to grow at a CAGR of roughly 4.1% over the next five years, will reach 10200 million US\$ in 2023, from 8030 million US\$ in 2017, according to a new GIR (Global Info Research) study.
