A milliamp clamp-meter can measure small electrical currents by simply clamping over a wire. This is especially useful in measuring the small pulses created by decoder activity on 2-wire irrigation circuits without undoing wire splices.

The electrical and electronics industry is expanding rapidly in regions such as Asia Pacific and North America. Therefore, advanced clamp meters are used to test electrical and other instruments in the manufacturing industry. The verification and certification process uses advanced clamp meters. These factors are expected to boost the growth of the clamp meter market. The growing power generation and construction industries have created huge demand for clamp meters. Clamp meters are required for maintenance on various types of wires and electrical instruments used in the power generation industry. Additionally, clamp meters are used in the construction industry to check electrical power in complex wiring. These factors are driving the growth of the market. Due to the development of the automobile industry, the demand for clamp meters is increasing.
