Global 5 largest manufacturers of Millimeter Wave Absorber are Laird Technologies (DuPont), Cuming Microwave Corporation, TDK Corporation, Nitto Denko and Home Sun Technology, which make up over 60%. Among them, Laird Technologies (DuPont) is the leader with about 30% market share. Asia-Pacific is the largest market, with a share about 40%, followed by North America and Europe, with the share about 28% and 21%. In terms of product type, Pyramidal Absorber occupy the largest share of the total market, about 58%. And in terms of product Application, the largest application is Automotive mmWave Radar, followed by 5G Communication.

Absorbing materials (Absorber) refer to functional materials that can absorb incident electromagnetic waves with little reflection, scattering, and transmission. They are used to suppress scattered or redundant electromagnetic radiation and avoid interfering with the normal operation of the system.

The absorbing material is composed of absorbent and carrier. Absorbents are composed of one or more components and play a major role in absorbing waves. The carrier is usually a polymer material, which is selected according to the required physical and mechanical properties and processing properties.
