Abstracts

The global Mini Centrifuge market size is expected to reach \$ 108 million by 2032, rising at a market growth of 6.0% CAGR during the forecast period (2026-2032).

Mini centrifuge refers to a small centrifugal device that is small in size, light in weight, and usually placed on an experimental bench or personal workstation. It mainly uses a motor to drive a micro rotor to rotate at high speed, allowing micro samples to undergo brief centrifugation, wall droplet collection, sample settling, micro stratification, and pre - and post experimental processing under centrifugal force. It is commonly used for 0.2 mL PCR tubes, 0.5 mL centrifuge tubes, 1.5 mL centrifuge tubes, 2.0 mL centrifuge tubes, eight tube tubes, and small volume liquid sample processing. In 2025, global Mini Centrifuge production reached approximately 194,867 Units, with an average global market price of around US\$ 356 per unit.

Mini centrifuges are laboratory basic small-scale equipment with low individual value, but their demand is dispersed and procurement frequency is stable. They are mainly driven by life science research, molecular diagnostics, PCR experiments, teaching laboratory construction, and the improvement of grassroots testing capabilities. Its core advantages are small space occupation, simple operation, fast startup, and suitability for short-term processing of trace samples. Therefore, it has strong practicality in personal workstations, teaching experiments, clinical laboratory pre-processing, and on-site rapid detection. The future growth focus will come from the popularization of molecular detection, laboratory automation support, expansion of miniaturized detection equipment, increased investment in teaching and research, and domestic substitution demand. However, the homogenization of low-end products is more obvious, and price competition will continue to exist. Enterprises with silent design, safety control, stable speed, durable rotors, and multi tube adaptation capabilities are more likely to obtain

stable orders.
