## Abstracts

According to our (Global Info Research) latest study, the global Miniature RGB Laser Module market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The Miniature RGB Laser Module is a modular design combining three powerful laser wavelengths - red (640nm), green (520nm) and blue (450nm) - in a robust surface mount package. The package is hermetically sealed to protect the module's laser base chip emitter from contamination and degradation. Our devices are currently used in laser microscopes, sensors, projectors and HUD displays, especially for new automotive systems with smart driving technology.
