## Abstracts

The global Miniature RGB Laser Module market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The Miniature RGB Laser Module is a modular design combining three powerful laser wavelengths - red (640nm), green (520nm) and blue (450nm) - in a robust surface mount package. The package is hermetically sealed to protect the module's laser base chip emitter from contamination and degradation. Our devices are currently used in laser microscopes, sensors, projectors and HUD displays, especially for new automotive systems with smart driving technology.
