## Abstracts

According to our (Global Info Research) latest study, the global Mining Drone Service market size was valued at US\$ 561 million in 2024 and is forecast to a readjusted size of USD 740 million by 2031 with a CAGR of 4.1% during review period.

Demand for metal minerals has generally declined, but new energy minerals have grown against the trend. Due to the global economic downturn, traditional industries have been affected, and the consumption of bulk minerals such as iron, manganese, and aluminum has declined. The growth of the new energy and new material industries bucked the trend, driving the rapid growth of the consumption of copper, lithium, cobalt and other new energy minerals. The mining policies of major countries and regions are intensively adjusted, and the mining investment environment is divided. Challenges and opportunities coexist. Affected by multiple factors such as economic recession, geopolitics, international trade, and investment obstruction, global mining investment still has risks.
