The global Mining Giant Engineering Tires market size is expected to reach \$ 6707 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

Mining giant OTR tires are ultra-large off-the-road tires designed for surface-mining equipment such as ultra-class rigid haul trucks and large wheel loaders. The term giant OTR is commonly associated with 49–63 inch rim-size tires, covering sizes like 27.00R49, 33.00R51, 40.00R57, 50/80R57 and 59/80R63. They prioritize extreme load capacity, cut/heat resistance and high TKPH performance for high-duty-cycle mining haulage conditions.

The upstream of the supply chain consists of core raw materials such as natural rubber/synthetic rubber, carbon black and chemical additives, and steel cord and bead wire; the downstream is divided into original equipment manufacturing (OEM) and replacement markets.

In 2025, global giant engineering tires production reached approximately 300 k units, with an average global market price is between \$7,000 and \$40,000 per unit.

This report studies the global Mining Giant Engineering Tires production, demand, key manufacturers, and key regions.
