Abstracts

The global Mist Collectors market size is expected to reach \$ 301 million by 2032, rising at a market growth of 3.6% CAGR during the forecast period (2026-2032).

Mist collectors filter mist from the air generated by coolants and oils used during wet machining and metalworking processes. Uncollected coolant and machining oil mist can cause slippery floors and collect on machines, walls and ceilings, creating an unpleasant, high-maintenance working environment.

Global core mist collectors manufacturers include Donaldson, Absolent, Nederman etc. The top 5 companies hold a share about 45%. Asia-Pacific is the largest market, with a share about 38%, followed by Europe and North America with the share about 36% and 20%. In terms of product, acrylic binder is the largest segment, with a share over 65%. And in terms of application, the largest application is mounted, followed by stand.

This report studies the global Mist Collectors production, demand, key manufacturers, and key regions.
