According to our (Global Info Research) latest study, the global mmWave Radar for Elderly Care market size was valued at US\$ 80.57 million in 2025 and is forecast to a readjusted size of US\$ 220 million by 2032 with a CAGR of 15.6% during review period.

mmWave Radar for elderly care is an advanced technology that uses millimeter-wave (mmWave) electromagnetic signals to monitor the health, movements, and safety of elderly individuals in a non-invasive manner. Operating at high frequencies, mmWave radar can detect subtle movements, vital signs (such as breathing and heart rate), and even detect falls without the need for physical contact or wearable devices. It can operate effectively through walls, furniture, and other obstacles, providing continuous monitoring in home environments, nursing homes, or healthcare settings. This radar technology is particularly beneficial for enhancing elderly safety, enabling early detection of emergencies, such as falls, and providing insights into sleep patterns, activity levels, and general well-being. It helps caregivers and family members stay informed, offering peace of mind and supporting elderly independence.

As the proportion of the elderly population increases, ensuring the safety and health of the elderly in their daily lives has become a focus of attention, especially for the elderly who live alone or suffer from chronic diseases. The need for real-time monitoring and timely response is more urgent. mmWave radar has become an ideal solution due to its non-contact monitoring, high precision, strong privacy protection, and freedom from light and environmental conditions. It can effectively detect falls, monitor vital signs, and provide activity pattern analysis to help prevent emergencies and improve the quality of care. In addition, with the development of artificial intelligence and Internet of Things technologies, mmWave radar systems have become more intelligent and easy to

integrate, further promoting their widespread application in the field of smart elderly care.
