## Abstracts

The global Mobile Blood Collection Service market size is expected to reach \$ 744.4 million by 2029, rising at a market growth of 4.2% CAGR during the forecast period (2023-2029).

Rising prevalence of cancer and infectious diseases, increasing demand for home point-of-care testing among the masses, and development of innovative home care technologies are the key factors driving the growth of mobile blood collection services market revenue.

During the COVID-19 outbreak, the demand for mobile blood collection services has increased significantly as it is a safer and more convenient process considering the current conditions and circumstances.

Most people will get routine blood tests, but because of the coronavirus, many people are reluctant to go to a hospital or clinic because of the risk of exposure to or potential infection with the virus. Due to widespread concerns and restrictions, mobile blood collection services are becoming increasingly popular.

This report studies the global Mobile Blood Collection Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Mobile Blood Collection Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Mobile Blood Collection Service that contribute to its increasing demand across many markets.
