Abstracts

The mobile browser is an on-device, client-side application that is resident on a mobile device. It provides access to content and applications from the Internet and, increasingly, in the cloud. Desktop and mobile browsers share many functions; however, increasingly, there are also differences, including the size of the screen, the power of the device (both processor and memory footprint), the speed of the network and the resources on the device. The browser for a mobile device has been considered a lower-functioning device than the browsers found on the desktop; as HTML5 and webkit-capable browsers find their way onto mobile devices, this is positioned to shift.

According to our (Global Info Research) latest study, the global Mobile Browser market size was valued at US$ 53660 million in 2023 and is forecast to a readjusted size of USD 85890 million by 2030 with a CAGR of 7.0% during review period.

Global Mobile Browser main manufactuers include Google, Apple and Microsoft, totally accounting for over 93% of the market. North America is the largest market, with a share over 50%. As for the types of products, it can be divided into default browser and user-installable browser. As for the operating system of products, it can be divided into Android, iOS and others. The most common type is Android, with a share about 80%. In terms of application, it is widely used in smartphone and tablet. The most common application is smartphone, which accounts for about 95% of all.

This report is a detailed and comprehensive analysis for global Mobile Browser market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and

product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2024, are provided.

Key Features:

Global Mobile Browser market size and forecasts, in consumption value ($ Million), 2019-2030

Global Mobile Browser market size and forecasts by region and country, in consumption value ($ Million), 2019-2030

Global Mobile Browser market size and forecasts, by Type and by Application, in consumption value ($ Million), 2019-2030

Global Mobile Browser market shares of main players, in revenue ($ Million), 2019-2024

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Mobile Browser

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Mobile Browser market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Google, Apple, Microsoft, Samsung, Alibaba, Baidu, Tencent, Mozilla, Opera, Puffin, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.
