Abstracts

According to our (Global Info Research) latest study, the global Mobile Concrete Batching Plants market size was valued at USD 796.5 million in 2023 and is forecast to a readjusted size of USD 1076.8 million by 2030 with a CAGR of 4.4% during review period.

It is mainly composed of stirring main engine, material weighing system, material conveying system, material storage system and control system and other ancillary facilities. Compared with the aggregate measurement in the station, the aggregate measurement in the building reduces four intermediate links and is vertical cutting measurement, which saves the measurement time and greatly improves the production efficiency. It works for roads, airports, tunnels, dams or any other application.

The Global Info Research report includes an overview of the development of the Mobile Concrete Batching Plants industry chain, the market status of Building Industry (0
