According to our (Global Info Research) latest study, the global Mobile Cryogenic Tank market size was valued at USD 997.1 million in 2023 and is forecast to a readjusted size of USD 1492.6 million by 2030 with a CAGR of 5.9% during review period.

Mobile cryogenic tanks are used for the storage of cryogenic liquids. Cryogenic liquids are typically liquefied gases at -150 °C or lower. Common gases include oxygen, argon, nitrogen, hydrogen, and helium. Liquefying gases into their cryogenic form allows for easier and cheaper forms of transport. Gases such as Helium, Argon, Oxygen, Nitrogen and Ammonia all take up a large surface area when in their gaseous state, so cryotechnology allows these to be compacted to be transported across the country.

Cryogenic transport tanks are containers used to transport cryogenic liquids such as liquid nitrogen, liquid oxygen, liquid argon, etc. They are mainly used in medical, industrial and scientific research fields. With the development of biotechnology, medical care and semiconductor industries, there is a demand for cryogenic transport tanks. Increasing. Especially in the field of biomedicine, cryogenic transport tanks are widely used to store biological samples and biological preparations, and market demand continues to grow. With the advancement of science and technology, the manufacturing technology of cryogenic transport tanks continues to improve. The application of new materials and new processes has improved the performance of cryogenic transport tanks, such as thermal insulation performance, safety, etc., which has also promoted the development of the market. The cryogenic transport tank market shows different development trends in different regions. Developed countries and regions have a greater demand for cryogenic transport tanks in the medical, scientific research and industrial fields, and the market size is relatively large; while the market development in

some developing countries and regions is relatively lagging behind, but with the growth of the economy and the improvement of medical standards, The market potential is huge. The cryogenic transport tank market is showing a growth trend globally, but different regions and industries have different development characteristics. In the future, with the continuous innovation of technology and the continuous expansion of market demand, the cryogenic transport tank market will continue to maintain steady growth.
