Abstracts

The global Mobile Encryption market size is expected to reach \$ 8036 million by 2032, rising at a market growth of 15.3% CAGR during the forecast period (2026-2032).

This report studies the Encryption software used for Mobile market. Mobile device encryption offers an easy fix for the problem of data breaches, which are the top threat posed by lost or stolen smartphones and tablets.

Encryption software is software that uses cryptography to make digital information difficult to read. Practically speaking, people use cryptography today to protect the digital information on their Mobile device as well as the digital information that is sent to other device over the Internet. As software that implements secure cryptography is complex to develop and difficult to get right, most computer users make use of the encryption software that already exists rather than writing their own.

McAfee(Intel Corporation), Blackberry, T-Systems International, ESET and Sophos are the top 5 players of Mobile Encryption, with about 31% market shares.

This report studies the global Mobile Encryption demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Mobile Encryption, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year.
