Abstracts

The global Mobile Fueling Solution market size is expected to reach \$ 1372 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

To address the problems of long queues, high costs associated with detours, and inconvenience in emergency refueling at traditional gas stations, mobile refueling solutions have emerged. Since the widespread adoption of mobile internet technology in the early 21st century, the energy retail and automotive aftermarket services sectors have experienced significant growth. Currently, mobile refueling solutions have evolved into a comprehensive service encompassing various types, including app-based booking, door-to-door refueling, and enterprise-level fuel management, widely applied in private car travel, logistics, and construction machinery operations, significantly improving refueling efficiency and the energy replenishment experience.
