According to our (Global Info Research) latest study, the global Mobile Hydraulic Valves market size was valued at US\$ 3383 million in 2024 and is forecast to a readjusted size of USD 4556 million by 2031 with a CAGR of 4.4% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

The mobile hydraulic valve is a key component in the hydraulic travel system. It controls the operation of the hydraulic motor and hydraulic cylinder by adjusting the pressure, flow and direction output by the hydraulic pump. Specifically, the hydraulic pump compresses the oil to generate pressure, and then adjusts the pressure and flow through the hydraulic valve to drive the hydraulic motor to rotate, thereby driving the mechanical equipment to move. The hydraulic valve can also control the traveling speed of mechanical equipment by adjusting the stroke of the hydraulic cylinder.
