## Abstracts

According to our (Global Info Research) latest study, the global Mobile Snow Room market size was valued at US\$ 386 million in 2025 and is forecast to a readjusted size of US\$ 654 million by 2032 with a CAGR of 7.8% during review period.

The mobile snow room is a modular and disassemblable true snow experience space. By integrating snow-making, insulation and intelligent temperature control systems, it creates a controllable local ice and snow scene in outdoor or indoor environments. It solves the pain points of traditional ice and snow projects such as heavy investment, long cycle and restricted site selection, and realizes 'snow-making at any time and snowfall anywhere' in a lightweight way, meeting the needs of off-season operation, short-term activities and immersive experiences in small spaces. The upstream involves manufacturing industries such as refrigeration equipment, insulation materials, atomization snow-making systems and intelligent control modules; the downstream is widely applied in supplementary snow-making for ski resorts, commercial real estate, cultural and tourism scenic spots, health and wellness resorts and private customization scenarios, promoting the extension of the ice and snow industry from heavy assets to flexible and scenario-based directions. In 2025, the output of mobile snow room is expected to be about 2,500 units, with an average price of about 150,000 US dollars per unit, a gross profit margin of about 35%, and a single line capacity of 50 units per year.
