According to our (Global Info Research) latest study, the global Model 555 Programmable Timer-Oscillator market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The Model 555 Programmable Timer/Oscillator is an integrated circuit chip that is widely used in applications such as timers, oscillators, pulse generators, flashing lights, etc. in electronic circuits. The 555 timer is composed of three resistors, two comparators, an RS flip-flop and an output stage, which can realize different timer and oscillator circuit functions according to the connection mode and value of the external circuit components. In the oscillator circuit, the output of the 555 timer can generate different output signals such as rectangular waveforms, square waveforms, and triangular waveforms. In the timer circuit, the 555 timer can realize functions such as monostable and multistable triggers.
