## Abstracts

The global Modem market size is expected to reach \$ 16690 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

A modem is a device that provides access to the Internet. The modem connects to the ISP, which typically provides either cable or DSL Internet service. Cable modems have a coaxial (or 'coax') connection, which is the same type of connector found on a TV or cable box. This connects to a cable port on the wall. DSL modems have a telephone connector, also called an RJ-11 jack, which connects to a telephone socket on the wall.

Global Modem key players include Motorola, Cisco, ARRIS, NETGEAR, TP-Link, etc. Global top five manufacturers hold a share about 50%. Asia-Pacific is the largest market, with a share about 40%, followed by Europe, with a share about 30 percent. In terms of product, DSL is the largest segment, with a share about 60%. And in terms of application, the largest application is Commercial Use, followed by Household.

This report studies the global Modem production, demand, key manufacturers, and key regions.
