According to our (Global Info Research) latest study, the global Modified and Pre-Accelerated MTHPA market size was valued at US\$ 138 million in 2024 and is forecast to a readjusted size of USD 218 million by 2031 with a CAGR of 7.1% during review period.

Modified and Pre-Accelerated Methyl Tetrahydrophthalic Anhydride (MTHPA) is a specially modified anhydride curing agent widely used in epoxy resin curing systems. Pre-accelerated for enhanced reactivity and stability, it enables fast curing at low temperatures, improving production efficiency. Compared to traditional anhydride curing agents, this product offers superior mechanical properties, heat resistance, and chemical corrosion resistance. It is particularly suitable for applications such as electronic and electrical encapsulation, coatings, composites, and wind turbine blades. Its low viscosity and excellent handling characteristics make it easier to process and blend in industrial applications.
