Modular belts are the belts consist of interlocking segment. It is easily replaceable and needs less maintenance. Modular belts carry high load capacities and are most preferred belt as compared to flat belts. The modular belt is preferred and ideal for the food and beverage industries as it can be easily cleaned and sanitized. It is an aggregation of plastic modules connected by the lateral rods. It facilitates the users to convey and clean the products efficiently. The modular belt drive is the drive which creates motion for the belt and thus is used to transfer the items or objects from one point to other.

Based on the types of belt drives, Light belt drive is used in agricultural machines and small machine tools. Medium belt drive is in machine tools. Large belt drive is used in the compressor, generator, and heavy machinery.
