According to our (Global Info Research) latest study, the global Modular Chain Drive market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Modular Chain drive is a way of transmitting mechanical power from one rotating shaft to another. It delivers a positive form of power transmission in the form of speed ratio and torque and keeps a positive speed ratio between driven sprockets and driver. Modular chain drive is widely used in manufacturing industries and automotive industries. Modular chain drive has various benefits over belt drives such as more compact, operate effectively at high temperature, can operate in wet condition and can be used as reversing drives. It is more effective than belt drive, owing to no power loss due to slippage.

North America accounts high market share in modular chain drive market across the globe followed by Western Europe, owing to high demand of modular chain in agriculture and pharmaceutical industry whereas rapidly growing automotive and manufacturing industries in Europe is estimated to witness high growth of modular chain drive market over the forecasted period. North America modular chain drive market is predicted to gain high growth rate over the forecasted period, attributed to high investment in research and development of agrisystem modular chain drives.
