According to our (Global Info Research) latest study, the global Modular Data Center Solution market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Modular data center solutions are installed on the floor like traditional data center but it saves lots of space because of its all-in-one design. Each component of the data center is an independent enclosed space, which contains air-conditioning, PDU equipment and fire-fighting equipment. The vendor will design and manufacture the components as per the client's preapproval in their factory. Modular data centers(MDC) may be based on components of modular blocks, pre-assembled and factory tested and provide a scalable solution and a delivery time that is shorter than in traditional brick and mortar construction.
