A modular dry vacuum system is a vacuum system consisting of multiple standardized, prefabricated modules. These modules can be combined and expanded according to different application requirements to achieve the required vacuum degree and pumping rate. Dry vacuum systems do not use oil or other working media, but instead use mechanical means (such as screws, vanes, etc.) to pump and exhaust air. This system is widely used in many fields due to its high efficiency, cleanliness, low maintenance cost and strong adaptability.
