According to our (Global Info Research) latest study, the global Modular Helium Purification Units market size was valued at US\$ 405 million in 2024 and is forecast to a readjusted size of USD 634 million by 2031 with a CAGR of 7.4% during review period.

Modular Helium Purification Units are compact, pre-assembled systems designed to remove impurities such as moisture, oxygen, nitrogen, hydrocarbons, and other contaminants from helium gas. These units use various purification technologies, including cryogenic separation, pressure swing adsorption (PSA), and catalytic oxidation, to achieve high-purity helium suitable for applications in semiconductor manufacturing, aerospace, medical imaging (MRI), and scientific research. Their modular design allows for easy scalability, quick installation, and integration into existing helium recovery and recycling systems, improving efficiency and reducing operational costs.
