Abstracts

According to our (Global Info Research) latest study, the global Modularized LNG market size was valued at US\$ 1285 million in 2025 and is forecast to a readjusted size of US\$ 2086 million by 2032 with a CAGR of 7.1% during review period.

Modularized LNG refers to the engineering, procurement, and construction (EPC) approach where Liquefied Natural Gas facilities are broken down into self-contained, pre-fabricated sections called 'modules.'

Instead of traditional 'stick-building' (welding every pipe and beam on-site), these modules are built in controlled off-site fabrication yards (often shipyards), transported via heavy-lift ships or barges, and assembled like giant building blocks at the final project site. This method drastically reduces construction time, improves safety, and cuts costs by avoiding remote-site weather delays and labor shortages.
