According to our (Global Info Research) latest study, the global Moisture Analyzer market size was valued at US\$ 513 million in 2024 and is forecast to a readjusted size of USD 630 million by 2031 with a CAGR of 3.0% during review period.

A moisture balance, also called a moisture analyzer, measures the amount of moisture in a substance. This is particularly helpful in food processing labs as the amount of moisture can be an indicator of freshness and quality for some foods. These analyzers are also commonly used in environmental, pharmaceutical, and materials science labs. There are several techniques that may be used to measure moisture. Some techniques used include measuring water vapor released following combustion of the sample, measuring the difference in weight after removal of moisture from the sample, and measuring the equilibrium of water vapor of the sample in a closed system.

For the major players of Moisture Analyzer, Mettler-Toledo maintained its first place in the ranking, followed by AMETEK, Sartorius, Metrohm and GE. Top 5 players accounted for 48% of the Global Moisture Analyzers (Moisture Balances) revenue market share.

In this study, the sales market for Moisture Analyzers (Moisture Balances) was divided into five geographic regions. Asia-Pacific occupied the largest sales market share with 45%. It is followed by Europe and North America with 23% and 19% respectively, while other regions have smaller market.
