Molasses for Animal Feed refers to molasses-based products processed and formulated for use in animal nutrition and feed manufacturing, primarily derived from sugarcane or sugar beet during the sugar production process. Rich in soluble sugars such as sucrose, glucose, and fructose, feed-grade molasses serves as a readily available energy source for livestock while improving feed palatability, reducing dust formation, and enhancing the binding properties of pelleted feed. In addition to carbohydrates, it contains valuable nutrients including minerals such as potassium, calcium, and magnesium, as well as organic acids, small amounts of proteins, and other nutritional components. Molasses for animal feed is widely used in ruminant diets, including dairy cattle, beef cattle, and sheep, as well as in swine, poultry, and other animal production systems. Based on product form and application requirements, feed molasses is commonly available as Liquid Molasses, Molasses Powder, and Molasses-based Feed Additives, playing an important role as an energy supplement and functional feed ingredient in the global animal nutrition industry.

In 2025, global Molasses for Animal Feed production reached approximately 15 Million Tons , and average price was USD 180/Ton , with gross margin 30% .
