According to our (Global Info Research) latest study, the global Molded Surface Mount Inductors market size was valued at US\$ 597 million in 2024 and is forecast to a readjusted size of USD 1390 million by 2031 with a CAGR of 12.8% during review period.

Molded surface mount inductors, also known as integrated inductors, are an inductor component that combines a winding with a magnet. Its production process usually involves first winding a winding, then filling and die-casting the metal magnetic material powder, and the pins are led out from the side and bent back. This type of inductor has the advantages of small size, light weight, and easy automated installation, and is widely used in various electronic devices.

The market size of molded surface mount inductors is huge and continues to grow. With the development trend of miniaturization and high power of electronic products, the market demand for molded surface mount inductors continues to increase. Especially in the fields of consumer electronics, communication equipment, automotive electronics, etc., molded surface mount inductors are more and more widely used. China is one of the major producers and consumers of one-piece molded inductors (molded inductors) in the world. In recent years, the market size of China's one-piece molded inductors has continued to grow, and it is expected to maintain a steady growth trend in the next few years.
