According to our (Global Info Research) latest study, the global Molecular Microbiology market size was valued at USD 7112.1 million in 2023 and is forecast to a readjusted size of USD 13900 million by 2030 with a CAGR of 10.0% during review period.

Molecular diagnostics is a collection of techniques used to analyze biological markers in the genome and proteome—the individual's genetic code and how their cells express their genes as proteins—by applying molecular biology to medical testing. Mainly because of their relative simplicity, ease of manipulation and growth in vitro, and importance in medicine, bacteria were instrumental in the development of molecular biology. In this report, we study global trends in the usage and purchase of diagnostic kits for the quantitative PCR detection and identification of pathogenic microorganisms using molecular microbiology (DNA/RNA diagnostics), both in human and veterinary medicine.

Global Molecular Microbiology key players include Roche, Qiagen, Illumina, Abbott, BioMerieux, etc. Global top five manufacturers hold a share about 65%. North America is the largest market, with a share about 50%, followed by Europe, with a share about 30 percent.
