The global Molten Salt Solar Energy Thermal Storage and Concentrated Solar Power (CSP) market size is expected to reach \$ 52700 million by 2032, rising at a market growth of 19.4% CAGR during the forecast period (2026-2032).

Molten Salt Solar Energy Thermal Storage refers to a kind of thermal energy storage method, which is widely used in the CSP system.

Concentrated Solar Power (CSP) (also called concentrating solar power, concentrated solar thermal, and CSP) systems generate solar power by using mirrors or lenses to concentrate a large area of sunlight, or solar thermal energy, onto a small area. Electricity is generated when the concentrated light is converted to heat, which drives a heat engine (usually a steam turbine) connected to an electrical power generator or powers a thermochemical reaction.

Abengoa, ESolar and ACWA are the top 3 players of Molten Salt Solar Energy Thermal Storage and Concentrated Solar Power (CSP), with about 10% market shares. North America and Europe occupied the majority of market share of CSP, and the market share is 25% and 29%.
