Abstracts

The global Mono Concentrate market size is expected to reach \$ 10988 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

In 2025, global sales of Mono Concentrate reached approximately 4 million tons, with an average market price of about USD 1900 per ton, an annual production capacity of roughly 4.7 million tons, and an industry-average gross margin of approximately 15%.

Mono Concentrate is a single-pigment–based concentrated colorant, where pigment is pre-dispersed at high loading in a carrier resin with additives, enabling stable, controllable, and repeatable single-color coloration during plastic processing.

Upstream includes pigments (organic/inorganic), carrier resins (PE, PP, PS, ABS, etc.), and dispersing additives; midstream focuses on formulation, compounding, pelletizing, and QC; downstream demand spans packaging, home appliances, automotive, construction materials, consumer goods, and engineering plastics, making it a volume-driven, non-discretionary consumable tied closely to plastic processing output.

This report studies the global Mono Concentrate production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Mono Concentrate and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
