MOPA desktop laser marking machine is a laser marking device that uses MOPA (Master Oscillator Power Amplifier) technology, which has the characteristics of high precision and high stability. MOPA laser can adjust the laser output within a wide range of pulse width and frequency by amplifying the laser signal through the gain medium, thereby achieving high-quality marking of different materials (such as metals, plastics, ceramics, etc.). Compared with traditional pulse lasers, MOPA laser marking machines can provide more delicate marking effects, and are particularly suitable for applications that require high-precision and delicate marking, such as QR codes, serial numbers, trademarks, etc. This equipment is widely used in electronics, machinery, medical, aerospace and other fields.
