MOPA fiber laser marking machine is a fiber laser marking device that uses MOPA (Master Oscillator Power Amplifier) technology. It achieves high-quality marking of different materials such as metals, plastics, ceramics, etc. by precisely controlling the pulse width, frequency and power of the laser. The advantage of MOPA technology is that it can adjust the pulse characteristics of the laser output, providing higher marking accuracy and better marking effect, especially in applications that require detailed marking, such as QR codes, serial numbers, patterns, etc. MOPA fiber laser marking machines are widely used in industries such as electronics, automobiles, aviation, medical and consumer products, with the advantages of high efficiency, good stability and long-lasting marking.
