According to our (Global Info Research) latest study, the global MOPA Nanosecond Lasers market size was valued at US\$ 85.3 million in 2024 and is forecast to a readjusted size of USD 115 million by 2031 with a CAGR of 4.4% during review period.

The MOPA nanosecond laser is a nanosecond-pulse laser based on Master Oscillator Power Amplifier (MOPA) technology. It generates a low-power, high-stability nanosecond pulsed laser signal from a seed source, which is then amplified by a power amplifier to obtain a high-power, high-beam-quality nanosecond pulsed laser output. Through this structure, it can precisely control the laser's pulse width, repetition rate, and energy to meet the needs of different application scenarios.
