According to our (Global Info Research) latest study, the global Mortise Lock & Cylindrical Lock market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Mortise locks and cylindrical locks are two types of locks that differ in their installation, security, and functionalit. Mortise locks are installed into a pocket cut into the side of the door, while cylindrical locks are installed through two holes drilled through the face of the door. Mortise locks have a more complex mechanism and a higher security level than cylindrical locks, as they combine a latch and a deadbolt in one lock. Cylindrical locks are either latch locks or deadbolt locks, and they have to be locked and unlocked separately. Mortise locks are better for commercial applications, such as hotel door locks and fingerprint door locks, while cylindrical locks are better for residential applications. Cylindrical locks are quicker and easier to install than mortise locks, which require more complicated manufacturing, installation, and maintenance.
