According to our (Global Info Research) latest study, the global Motherwort Capsules market size was valued at US\$ 69.15 million in 2025 and is forecast to a readjusted size of US\$ 108 million by 2032 with a CAGR of 6.7% during review period.

In 2025, global production of motherwort capsules reached 24 million boxes, with an estimated average selling price of \$2.80 per box. Motherwort capsules are oral proprietary Chinese medicines or herbal capsule formulations made primarily from motherwort (dried or fresh). They are produced through processes such as extraction, concentration, drying, and granulation (or preparation of soft capsule fill material), followed by hard capsule filling or soft capsule encapsulation. They are primarily positioned for use in regulating menstruation and postpartum recovery. The upstream supply chain includes motherwort cultivation and harvesting, year-round supply of fresh motherwort, processing into herbal decoction pieces, motherwort extract, capsule shells (gelatin or plant-based materials), soft capsule ingredients (vegetable oil, glycerin, beeswax), aluminum-plastic blister packs, paper cartons, and quality testing equipment. The midstream involves extraction, concentration, capsule filling or encapsulation, drying, packaging, stability testing, and registration/brand sales. Downstream customers primarily include hospital gynecology departments, maternal and child health institutions, pharmacies, e-commerce platforms, primary healthcare facilities, and overseas herbal supplement retail channels. The gross profit margin ranges from approximately 25% to 45%.
