According to our (Global Info Research) latest study, the global Motherwort Drug market size was valued at US\$ 297 million in 2025 and is forecast to a readjusted size of US\$ 444 million by 2032 with a CAGR of 5.9% during review period.

In 2025, global production of motherwort drugs reached 131 million units, with an estimated average selling price of US\$2.2 per unit. Motherwort drugs refer to gynecological products for regulating menstruation, postpartum recovery, or herbal health management, made primarily from motherwort through extraction, concentration, granulation, paste preparation, tableting, capsule encapsulation, or preparation as tinctures/herbal drops. These mainly correspond to traditional Chinese medicine preparations such as motherwort granules, motherwort paste, motherwort tablets, motherwort capsules, and motherwort oral liquid. Their main functions are "regulating menstruation and nourishing blood, resolving blood stasis and promoting new blood production," used for menstrual disorders, dysmenorrhea, scanty and dark menstrual flow caused by blood stasis and qi stagnation. The upstream of the industry chain includes the planting, harvesting, drying, processing of medicinal slices of motherwort, production of motherwort extract, sucrose/dextrin/honey/excipients, packaging materials, testing equipment, and GMP production systems; the midstream consists of traditional Chinese medicine companies and herbal preparation companies; and the downstream mainly includes hospital gynecology departments, primary healthcare institutions, pharmacies, chain pharmacies, e-commerce platforms, and cross-border traditional Chinese medicine retail. The gross profit margin is approximately 25%-40%.

Regionally, the Asia-Pacific market led by China is the core market and is maintaining rapid growth. In North America, the market is primarily driven by channels serving the

Chinese community and herbal supplements, while in Europe, products appear mostly in forms such as tinctures, extracts, and capsules. Looking ahead, the development of motherwort products will trend toward sugar-free granules, low-sugar or portable stick packs, standardized extracts, branded OTC positioning, e-commerce expansion, segmentation for women's health, applications in postpartum recovery, compliance for overseas herbal supplements, and traceability of raw material quality.
